

Vision:

Pateros as an urban village sustained by the information economy and a healthy, educated, skilled and empowered citizenry living in a peaceful, orderly and environmentally sustainable community achieved through a highly responsible local government leadership.

Mission:

Diversify the economic structure and provide new economic development opportunities for the municipality

- Increase economic linkages with neighboring urban areas
- Improve the overall health condition of the populace
- Improve the provision of social services to the underprivileged and vulnerable members of the community
- Improve the competitiveness of the municipality as a human resource base in the national and global arena
- Improve mobility by providing intra and inter-municipal access
- Provide for a green and open space system to improve overall environmental quality
- Minimize effects of flooding and natural hazards
- Improve capacity for income and resource generation and mobilization thereby decreasing the LGU's dependence on the Internal Revenue Allotment
